

TAKE & MAKE

CRAFT KIT

WINTER BIRD FEEDER

Included:

- Birdseed
- Gelatin
- Twine

Needed:

- Cupcake pan

Instructions:

Measure two cups of water and place it in a pot. Carefully, and with adult supervision when necessary, bring the water to a boil.

Once the water is boiling, take off the heat and mix in the packet of gelatin until completely dissolved.

Once the gelatin is made, mix in the birdseed. Mix until all the birdseed is completely covered in gelatin.

Place the birdseed into a pan to mold the shape of your birdfeeder. With a fork, make a small circle near the top of the birdfeeder for the twine to go through.

Let the birdfeeder set for 4-6 hours, or overnight if possible.

Once time has passed and the birdfeeder has set, remove it from the mold.

Using the twine, slip it through the birdfeeder and tie a knot so that you may hang it.

Find a place to hang it, and enjoy watching our feathered friends have a snack!
