

TAKE & MAKE CRAFT KIT Heart Wreath

Instructions:

1

Cut out the inner part of the paper plate leaving the outer rim intact. Try slightly folding the paper plate in half and then cutting out middle. Straighten out. You will be using the outer rim for this heart wreath craft.

2

Place your circle upside down and glue the larger sized hearts on first. If the large hearts don't cover all of the paper plate, don't worry as you can use the smaller sized hearts to fill in.

3

Once you have glued on all the hearts, turn the paper wreath over and glue or tape on a small length of ribbon at the top to hang your wreath.
