

Straw Rocket

Instructions

<https://youtu.be/IKDeGrj83LQ>

- 1** Take your eraser and place it on the end of your straw.
- 2** Take your metal fastener and tilt it downward. Then attach it onto the straw just below the eraser.
- 3** Create 3 triangular fins out of the cardstock provided and tape them to the bottom of your straw.
- 4** Place your rocket to the side and grab your popsicle stick.
- 5** Place a piece of tape on one side of your popsicle stick without folding it over.
- 6** Place your large rubber band on the sticky side of the tape and fold it over.
- 7** Now you can use the popsicle stick as a slingshot by placing the metal fastener onto the rubber band and launching your rocket. Go outside and test your rocket!
