

# TAKE & MAKE

## CRAFT KIT

# Koala Finger Puppet

## Supplies:

- koala finger puppet template on gray cardstock
- small googly eyes
- pencil for tracing
- scissors
- black cardstock
- glue stick

Cut out each of the pieces from the gray template.

Use the nose as a template to trace it on a scrap piece of black cardstock with a pencil, and then cut it out.

Glue each of the ears onto the koala head.

Then glue the nose in the center of the koala face. Use scissors to cut small slits along the bottom half of each koala ear. This is optional, but it adds some fun texture to your koala craft.

Add glue at the top of the koala body and attach the koala head to it. Then glue each of the arms onto your koala.

Place a dot of glue on the back of two small googly eyes and place them on your koala face.

Have an adult help to cut out the finger holes.

Use a fine tip marker, colored pencil or crayon to draw a smile on your koala.
