

# TAKE & MAKE CRAFT KIT

## OUT OF THE WORLD

### Instructions

Grab the little green cutout and design your little green friend to your liking!

Now it's time to color their spacecraft. Two plates have been stapled together and you can color them how you want!

Place your little green friend on top and glue them on. Make sure to give them a proper fold to ensure they fit in the cup and look like they're standing.

When the glue has dried and your little green friend is ready, glue the cup around them so they are inside of it. Once the glue is dry, the captain is ready to fly!

Want to learn about the mysteries of space? Looking at our Nonfiction section in the 520s will be your ticket to the universe! Does life exist on other planets? Maybe the Nonfiction section around 001 has some clues...
