

TAKE — and — MAKE

ROPE COASTERS

Materials:

Rope (colors will vary)

Cork tile

Scissors

Hot glue gun & glue sticks

Directions:

1. Taking one end of the rope, fold into a small circle, and glue it to itself.
2. Continue wrapping the rope around itself in a tight circle, gluing as you go. Make sure to hold the glued portions down tightly for several seconds before moving to the next.
3. Upon reaching the end of the rope, glue down and apply a dab of glue to the end to prevent fraying.

OPTIONAL: Cut the cork to a slightly smaller circle than your coaster and glue to the bottom for extra heat-resistance.

Enjoy!
