

As Seen On TikTok: Pull String Art

Supplies:

Canvas (Included)
String (Included)
Acrylic Paint (Included) (Caution: Paint will stain clothes.)
Brush
Parchment Paper

Instructions:

Prepare your work space. Use the parchment paper (or something else) to cover the surface you will be using to catch dripping paint. Tip: Place your canvas on a rack on top of the parchment paper. This will help your work not stick to anything.

Plan your design and measure your string. Place the string on the canvas in your desired design in order to know how much string is needed.

Cut your string and place it on a separate sheet of parchment paper.

Generously coat your canvas with your chosen base paint. Spread the paint with a spreader or brush. Be sure to spread it evenly, coating the entire surface of the canvas.

Coat the string with your chosen design colors, using a brush to cover it completely. You can alternate two colors or create your own pattern with multiple colors. Leave a clean space at the end of the string so you have somewhere to hold it.

Carefully place string on canvas in previously chosen design pattern.

Grab string from unpainted bottom and slowly pull downward off the canvas. Be sure to keep the string in the same spot when pulling.

Set in a safe place to dry. Since the paint is thick, it can take up to 24 hours to dry completely.

Your work is finished. Hang it up and admire it.
