

As Seen On Tik Tok: Water Color Prints 🎵

Need:

Watercolor Paper
Water Based Markers
Squirt Bottle With Water
Plastic Bag

Instructions:

Color on your plastic bag with water based markers.

Spray your bag with a few squirts of water.

Lay your paper on the colored bag and watch the water color effect show up. Help the color travel a little by smoothing your bag out.

Let the colors dry on your paper. Once dry decorate with a cool quote or picture. Black markers on the color really pop, but you can use whatever colors you'd like.

Hang up your finished work in your bedroom or another special place. Or give it to someone special.
