

Himmeli Star Ornaments

This is an extra set of instructions for you, in case you'd like to try a harder Himmeli Ornament. These ones turn out really cool and look awesome hanging up.

Supplies: (Not Included)

- 5 Long Straw, 15 Short
- Wire (Can use string too, but wire works better)
- Scissors
- Ruler

Instructions:

- 1) Cut 5 straws to 3.5 inches and 15 others to 2 inches.
- 2) Take about a yard and a half of thin wire. Put a long straw with 2 small to make an acute triangle.
- 3) Add 2 short straws to the other side and run the wire back through the long center straw.
- 4) Continue that process until you have 5 long straws connected with Y shaped sections of 3 short straws.
- 5) Twist off the excess wire and tuck it inside a straw. It looks great...but not really geometric.
- 6) Pinch up the center straws. Bend in the Y cross sections. It should be super easy to mold because of the wires. Keep going until it's a gorgeous dimensional 5 point star!
- 7) Hang your work up, or create more. If you make a bunch you can tie them together to make garland or even a wreath.
