

TEEN TAKE & MAKE CRAFT KIT

Bees Wax Sushi Candles

Supplies:

Beeswax Honeycomb Sheets
Wick
Ruler (Not Provided)
Knife (Not Provided)
Blow Dryer (Not Provided)

Instructions:

Bees wax is pretty easy to work with. First you will need to choose your fillings for your roll. Choose one or more colors of wax to represent your fillings. Lay your wick across one end of your wax strip. Start rolling from the wick end and keep going until you're out of wax. Choose your next color that you'd like to use and roll it onto your first piece. You can use a blow dryer to make your wax a bit more flexible and sticky, just don't melt it to much. You can even do multiple individual rolls and smoosh them together to create a different look.

Once you are happy with your insides, choose a color to be your outside. We recommend white for rice or black (or a dark color) for seaweed.

Cut your wick about 1/4 - 1/2 inch above the wax.

You're all done.

When you light your candle, always put it on a fire safe plate, and always keep an eye on it.
