

DIY MINI MANGA

TEEN
TAKE & MAKE
CRAFT KIT

Supplies:

- Mini Manga Templates
- Scissors (not provided)
- Hot glue gun or elmer's glue(not provided)

Directions:

Start by working on one mini manga at a time.

Cut out all the mini manga templates. Meanwhile you cut them make sure to set up you hot glue gun if you choose this gluing method that way it's ready by the time you need to use it. Once all the pieces are cut you're going to fold the pages of your mini manga accordion/zig zag style.

After you have folded all the inner pages you will put the according pages together side by side and glue the pages the spine of your manga. Before the glue dries immediately add the cover to your mini manga and press firmly on the spine. Careful not to get glue on your fingers or pages.

Let it cool for a few minutes and you're all done! They great for nendroids/ figures or just as cute mini versions of your favorite manga! If you loved how they came out tag us on Insta, TikTok and Facebook! We'd love to see how they came out!
