

Melted Bead Snowflake Suncatcher

TEEN
TAKE & MAKE
CRAFT KIT

Supplies:

- Plastic Pony Beads
- Cookie Cutter
- Ribbon
- Aluminum Foil
- Baking pan (not provided)
- Drill fitted with 1/8 inch drill bit (not provided but can be checked out from the library of things at the front desk!)

Directions:

Preheat your oven to 400 degrees. Then line a baking pan with aluminum foil to protect the pan and make it easier for the ornaments to release from the pan. Add snowflake cookie cutters to the pan and fill each cookie cutter with a single layer of beads. You can use a toothpick or bamboo skewer to arrange the beads. Carefully put the baking sheet in the oven and melt the beads. Begin checking at 5 minutes. The snowflake ornaments are ready when the beads are melted and the hole in each bead has disappeared. Remove the melted bead ornaments from the oven and allow to cool completely. To remove, gently pull the sides of the cookie cutter away from the melted beads. Use the drill to create a small hole in each snowflake ornament and tie a piece of string or ribbon for hanging. If you loved how they came out tag on Insta, Tiktok and Facebook! We'd love to see how they came out!
