# Lucky Shamrocks

TAKE & MAKE  
CRAFT KIT

In A Jar

**Supplies:**

Small Jar  
Peet Pellet Soil  
Clover Seeds  
Water  
Sunlight

**Instructions:**

Decorate your jar (if you wish) before you plant your clovers.

Add a peet pellet to the bottom of your jar. This is your soil/dirt.

Gently scatter your seeds on the pellet.

Give your seeds a bit of water and put your jar in the sun. (Do not cover your jar.)

Keep giving your seeds/plants a bit of water each time the dirt/pellet gets dry to the touch.

Soon you'll see your clovers grow.

Find a 4 leaf clover in your plant for extra good luck!
