Neon Glow Art

Supplies:

* Black Cardstock Paper
* Paint Markers (Not Included)
* Colored Pencils (Not Included)
* White Paint Marker (Not Included)

Start by making a sketch of whatever you'd like with a normal pencil on the Black Cardstock Paper provided. It can be anything, let your imagination flow! Once you're done with your sketch you can pick any color you want for your neon art. It can be yellow, orange, blue red, pink, any color you'd like as long as you have the same color for both the paint marker and the color pencil. Now trace your sketch with your color of choice Paint Marker (It's best to use a thick tip paint marker). If your lines aren't as pigmented as you'd like you can always go over your lines again until you get the desired color. After your done tracing all your lines in color you're going to now trace your art with a White Paint Marker. Make sure the white line you are now tracing fits inside the colored line (For the white line you can use a fine tip paint marker). Once you're finished tracing with the White Paint Marker you're going to use the color of choice Colored Pencil (that matches with the color of choice paint marker) to make the glow effect in your art. You do this by coloring softly around all your colored lines like the images below. Now you're all done and your art is ready to be displayed! It looks great under a black light as well!
