

YARN EGGS

Materials:

Yarn

Mod Podge

Water balloons

Scissors

Small bowl

Directions:

1. Add 1 part water and 2 parts mod podge and mix in a bowl (disposable if possible)
2. Blow up the balloons until they are about 3 inches long. Tie off the balloons.
3. Dip one section of the yarn into the mixture until completely covered. Squeeze off any excess glue.
4. Begin wrapping the yarn around the balloon. The more times you cross the yarn, the more secure the finished product will be. Continue wrapping until you are satisfied with how it looks.
5. Repeat steps 3 & 4 with the remaining balloons and yarn.
6. Allow your eggs to dry.
7. Once the yarn is firm and dry, pop the balloon and remove it from the yarn.
