

Felt Succulents

Teen
TAKE & MAKE
CRAFT KIT

Supplies:

- * Felt
- * Mini Pot
- * Hot Glue Gun and Hot Glue (Not Provided)
- * Scissors (Not Provided)

Directions:

Cut along the lines on the felt all the way through. Once cut, starting from the smallest petal end you are going to roll it to create the little spiral in the middle and you glue into place with a hot glue gun. Keep rolling the felt little by little making sure to add glue every so often. You can move the petals around to your liking as you glue them into place just be careful the glue is HOT. Once you're done rolling and gluing your succulent all the way through, you're ready to glue it into the pot and you're all done!
