

# TEEN TAKE & MAKE CRAFT KIT

# Rock Photo Holder

It's time to create an easy and cool way to display your favorite photos, quotes, and more!

## Supplies

A Flat Rock (River Rocks Work Really Well)

Paint Or Permanent Markers

Wire

Beads Are Optional

## Directions:

Wash off your rock and then let it dry. (The paint or marker will stick better with a clean rock.)

Decorate your rock to your liking using the paint or markers. (Paint works best.)

Wrap some of your wire around the rock. Leave a long straight part sticking up from the top of your rock. (That will be where your photo will go.)

If you'd like to add beads to your wire, now is the time to do so. Add your beads to the straight "stem" part of the photo holder.

Take the remainder of the wire and using a marker or other round item, wrap the wire around it to create a circle. (See photo on the side.)

Your Photo holder is done. You should be able to add a photo to the wire circle that you just made.

If you'd like to make more photo holders, consider stacking rocks to create different heights. (See photo on the side.)

Or bend the straight wire to create a design before reaching the photo.
