# BUTTERFLY BOOK

## Materials:

Book  
Craft knife  
Butterfly cut-outs  
Wire  
Floral foam  
Glue  
Scissors

## Directions:

1. Open the book to the halfway point. Take around 10 of the middle pages and secure them together. **DO NOT RIP THEM OUT OF THE BOOK.**
2. Using the knife, cut a large rectangle in each side of the remaining pages of the book, about 1 inch away from all edges. Cut into the pages until the rectangles are around 1 inch deep.
3. Cut the floral foam into thin rectangles and place into the rectangles you cut into the book.
4. Allow the pages you tied back in Step 1 to cover the cut outs.
5. Cut the wire to make stems, about 1 foot for the taller stems and 1/2 foot for smaller ones.
6. Fold the wire over and twist the two parts together into a spiral.
7. Taking two of the butterflies, put the wire in the middle and glue them together. Taller wires can fit 2 or 3 butterflies, shorter wires only 1. Continue this with the rest of the butterflies until the wires are filled.
8. Stick the finished wires through the book pages and into the floral foam.
