

Y2K Phone Charms

Supplies:

- * Beads
- * Cord

Take the cord that's already cut and knotted and make sure it's the length you'd like. If it's not, cut it to the length you'd like. You can plan out your pattern for your phone charm first and then begin stringing the beads through or you can plan as you go! Once you're done adding all the beads you need tie the ends of the cord into a very tight knot. You can hide the knot underneath a bead. ~Now it's ready to be added to your phone!
