

TEEN TAKE & MAKE CRAFT KIT

Mini Balloon Pumpkins

Supplies:

Orange Balloon
Floss/String
Stuffing
Green Floral Tape
Craft Wire

Instructions:

Cut some of the opening end off of your balloon. (Get rid of the bump at the part where you blow up the balloon.)

Fill your Balloon with stuffing.

Stick the wire in the opening of the balloon, leaving part of it sticking out.

Wrap your string around the opening of the balloon to close it up. Then wrap the string around the balloon so it makes the indents that you see on a real pumpkin. Tie off your string at the opening of your balloon.

Use the green floral tape to wrap around your tied off opening and wire, to make it look like your pumpkin has a stem.

Add a floral tape leaf to your stem if you'd like.
