

**Materials:**

Mason Jar Lid/Ring  
Paper/Coloring Sheet  
Markers  
Glue  
String/Ribbon

To make your sun catcher more colorful you can paint the mason jar ring before beginning. Be sure to allow plenty of time for it to dry before putting your sun catcher together.

Pick out art on regular computer paper and color it with markers, or draw your own art.

Trim the art to the size of your mason jar ring.

Once you've colored your art and cut it out, carefully dip a cotton ball in olive oil and apply the oil to your paper. The oil will make the colored artwork become almost translucent and will allow the sun to shine through. Wipe off any excess oil with a dry cotton ball or paper towel. Set aside and allow to dry.

Carefully add a bead of glue to the inside of your mason jar ring. Place your artwork inside with the colored side facing out.

Wrap ribbon, twine, or string around the outside of the mason jar ring and tie a knot at the top to secure it in place. Be sure to leave enough length to use for hanging it.

Hang it in a window and enjoy!
